So, as I understand it, the settlement allows them to INCREASE their installed Win-Tel product base! Rather than require them to donate THEIR software and computers it should require them to actually give \$\$\$ to be used BY the SCHOOLS for software and computers OF THE SCHOOLS CHOICE! Why should the SETTLEMENT of a MONOPOLY allow them to INCREASE their installed base and PROFIT??

Also, THEY should be required to pay ALL LEGAL FEES. Why should I as a taxpayer pay them. The payment of legal fees is NORMAL!

I really think more than this should happen but I know from the way you are currently approaching this that more would be unrealistic.

Also, the issue was never really MONOPOLY as much as it was extortionate business practices, lying etc. But these are all things that are condoned by government. Microsoft is really just a microcosm of our politics.
